

Ligamentous Articular Strain

Date: February 10-12, 2023

Location: Orlando, Florida

Course Director:

Wm. Thomas Crow, DO, FAAO

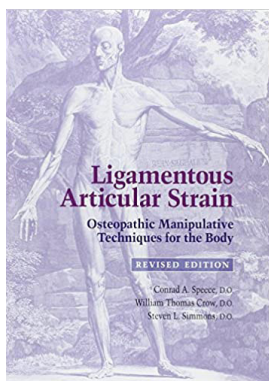

Register online at www.academyofosteopathy.org

Course Description

Ligamentous Articular Strain Techniques are methods which focus on areas outside the craniosacral axis, based (in large part) on the original work of William G. Sutherland, the founder of Cranial Osteopathy. These techniques are a dynamic, yet gentle, approach. The course teaches the scientific basis and principles underlying ligamentous articular release as well as how to apply it to the body. Also, there is time devoted to how to find the key lesion.

All attendees will receive a copy of *Ligamentous Articular Strain: Osteopathic Manipulative Techniques for the Body, Revised Edition*.

Continuing Medical Education

20 credits of AOA Category 1-A CME anticipated
