Objectives

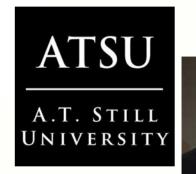

- Educate physicians on Safe Sport
- Discuss training for a sports medicine physician to be qualified and represent at the Olympics while traveling with Team USA
- Educate physicians on etiquette of the sports medicine team physician when traveling and protocol for seeing athletes
- Identify different aspects of physician preparedness when traveling with Team USA

- How does one get selected to serve as the team physician for the USOC and/or Team USA?
- 4 KEY POINTS:
- 1. Osteopathic education/training-mad skills/human touch
- 2. Compassion to help people and commitment to putting athlete well-being first
- 3. Excellent preparation and training before the games
- 4. Recognizing team work approach to medicine

Your Beginning

- Intense and quality education and training begin at your Osteopathic Medical School
- COM provides you with the support, guidance and Osteopathic tools to be successful and stand out above the rest.
- Your hard work, determination and passion to help people drives your practice/skills.
- Your commitment to quality/safe care and Osteopathic oath: First Do no Harm, is golden. Ethics.

Safe Sport

- Non profit Organization for champion respect and ending abuse in sports (rec leagues to pros) & all ages
- Provides education and training and response and resolution
- Training programs and safe sport code utilized by US Olympic, Paralympic and 49 NGB teams
- www.safesport.org

Safe Sport

- As a team physician, you are an integral part of the athlete's well being
- Be aware and look out for the athlete: sexual misconduct, bullying, harassment, physical and emotional abuse
- Utilize policies and procedures of safe sport. Report immediately any allegation of abuse
- Protect athlete against retaliation

Safe Sport Policies and Procedures

- Must be followed by organizations and individuals whose NGB is recognized by USOC
- Protect all covered participants: athletes, officials, coaches
- Prohibit behavior that is not considered criminal
- Include procedures for investigating/responding to claims of abuse/misconduct
- Do not carry any criminal consequences

Safe Sport Important Tips

- Limit one-on-one interaction
- Travel
- Physical Contact
- Locker rooms and changing areas
- Electronic communications and social media

Limit one-on-one Interaction

- Meet in public areas for meetings where interactions can be observed/interrupted
- If have to have a private meeting: keep door unlocked/open or take a walk where non team members are

- At least 2 deep leadership (ATC/team Doc, team mgr)
- Maintain good communications with parents, team mgr, coaches
- If asked to transport athlete, take some one else ride along
- Country Ambassador for teams at competitions

Physical Contact

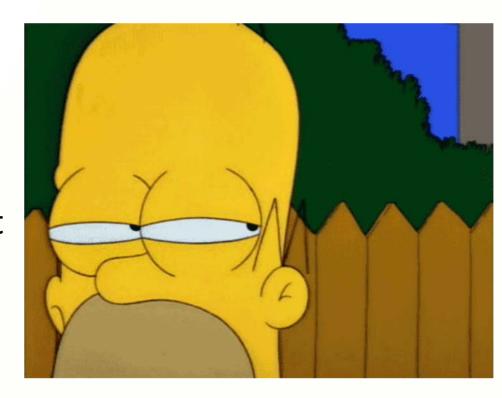

- Keep in place where athlete feels safe, around other athletes and medical staff. Usually with ATC at all times!
- Set and enforce policies that limit out of program contact (coach's home, athlete living quarters)
- Work with team mgr: off site activities, supervision required
- Includes: OMT, stretching, deep tissue, taping, icing, use of equipment, contrast baths, procedures

- Social media and electronic communications-balance this primary method for privacy and access
- Each team selects best way to communicate depending on what country you are in (What's APP)
- limit interaction on social media sites to organizations or team pages
- keep all communications professional and related to team /organization activity
- used organized accounts to communicate with athletes rather than personal account

Safe Sport Teachings

- Common abuse myth: people who sexually abuse children/minors make everyone around them feel uneasy.
- TRUTH: Offenders are very skilled at deception. Many are well-liked and highly trusted, not only by victims, but by their colleagues as well.

Create a Safe Environment

Rio2016...

- Screening
- Monitoring
- Establishing boundaries
- Responding and reporting
- Managing training and competition

USA Volleyball

Travel to Different Countries

- CDC Website
 - Vaccines: All, Most, Some
 - Maps of Specific Areas (ie Malaria)
 - Stay Healthy and Safe (Food/Drink, Bug Bites, Animals, etc)
 - Healthy Travel Packing List
 - Travel Health Notices
 - After Your Trip
